

# Rot Resistant Pine Decking

*Thermally Modified to Last*

DISTRIBUTED BY

# Thermally Modified Decking

**You can't control the weather or nature,  
and we don't expect you to:**

- Regardless of your location or the time of year, TemperPine decking does not warp, expand, contract (swell /shrink) or become a food source for insects due to seasonal changes in temperature and humidity.
- TemperPine's low moisture content also makes it virtually impervious to fungi and bacteria that can cause decay.
- Decking meant to last, TemperPine boasts a very long biological/service life of a minimum of 15+ years.

DECKING	TemperPine™	Cedar	Composite
COST	Low	Medium	High
ECO FRIENDLY	★★★★★	★★★★★	★
DURABILITY	High	Medium	High

## Easy to install

- Available in 2400mm, 3000mm and 3600mm lengths
- Size: 26mm thick x 140mm wide
- Uses traditional fastening methods
- 3/16" spacing recommended

## The environmentally friendly deck board

### TEMPERPINE PROCESS

TemperPine - Thermally Modified Timber (TMT) is the process of dehumidification and minimizing deformation behavior by increasing the internal temperature of the wood above 200°C. As a result of the decomposition of relative humidity in the wood, the products become permanently resistant to fungi and decay, offer a long term performance by it's increased durability and high dimensional stability.

Thermally modified wood does not produce harmful organisms like fungi and it does not bend or contract. Also, it is not adversely affected by seasonal conditions. By decomposing the relative humidity in the wood, TMT products become more durable to humidity, more resistant to decay and external weather conditions.

TemperPine's TMT process is a natural process in which no chemical substances are used at any stage. The products are completely eco-friendly, non-toxic and recyclable.

### PINE DECKING

TemperPine decking products are manufactured from Scandinavian pine trees called as Scotts Pine. With its knotty structure, it is the preference of those who love the naturalness of wood and it's history.

Sustainable product from responsibly managed FSC renewable forest from Finland.

TemperPine decking boards are suitable for many areas of usage such as pool sides, terraces, balconies, and pier constructions.

Origin Finland

### Timeless beauty applies here

TemperPine decking features a beautiful brown tone. As it naturally weathers and if untreated with UV-protected oil, our decking begins to feature a beautiful silver-gray patina.

### Easy installation and maintenance

Let's be honest, installation and maintenance can be quite the headache. That is why the easy installation and maintenance of TemperPine decking is a top priority, saving you a lot of time, energy, and money in return.
